ABOUT ME

I am a Cloud Linux Engineer with expertise in **AWS** and **Azure**, specializing in designing and managing scalable cloud infrastructure. Proficient in **Linux** administration, **Terraform** for infrastructure-as-code, and optimizing system performance with a strong focus on security.
I have experience in cloud migrations, troubleshooting complex issues, and debugging system failures to ensure high availability and reliability.
My goal is to deliver secure, efficient, and scalable cloud solutions while driving innovation in cloud technologies.

RELEVANT EXPERIENCE

Linux Cloud Engineer   2022 - PRESENT
Hostersi sp z o.o. l Rybnik

- Managing cloud infrastructure across **Microsoft Azure Cloud**, A**mazon Web Services** (**AWS**), and diverse Data Centers (**OVH, Hetzner, ScaleWay, Oracle**)
- Monitoring systems and applications using **Prometheus**, **Grafana**, **Nagios**, and **Observium**
- Implementing and maintaining solutions across **Linux** and **Windows Server** environments
- Managing database infrastructure utilizing **MySQ**L, **PostgreSQL**, and **Microsoft SQL Server (MSSQL)**
- Containerization and management **Docker** (debugging and monitoring **Kubernetes)**
- Implementing infrastructure as code with **Terraform** and managing version control through **GitLab**
- Developing and executing B**ash scripts** for automation system
- Configuring and optimizing web server infrastructure using **Nginx** and **Apache**
- Implementing and maintaining **PHP** application environments
- Performing virtualization management using **KVM**, **Proxmox** and **Hyper-V.**
